ABOUT

FEECO International, Inc. was founded in 1951 as an engineering and equipment manufacturer. Today, we provide an array of process solutions, equipment, and services to companies looking to solve material problems, develop advanced processes, and streamline production. We've built a reputation on custom, quality work that has allowed us to serve thousands of companies around the world with the best in agglomeration, thermal processing, and material handling equipment.

FEECO is recognized globally as an expert in providing:

- Custom Equipment Manufacturing
- Engineering
- Feasibility/Materials Testing
- Process Design & Development
- Process Optimization
- Product Development
- Parts & Service

WHO WE WORK WITH

Many of the world's most notable companies, across nearly all industries, rely on FEECO for innovative solutions in process design, engineering, and manufacturing, including:

INDUSTRIES WE SERVE

- Chemical
- Fertilizer & Granulation
- Mining & Minerals
- Power Generation
- Forest Products
- Waste Transformation

EQUIPMENT

BUILT TO LAST

AGGLOMERATION EQUIPMENT

AGGLOMERATION DRUMS

ABOUT
[Agglomeration drums](#) are diverse in their ability to accomplish a variety of objectives. They are favored for their durability and high throughput.

SIZE
 Diameters from 36" - 15'
 (1 - 4.6m)

CAPACITY
 500 lb/hr - 3500+ TPH*

APPLICATIONS

- Granulation
- Agglomeration
- Conditioning
- Coating
- Mixing

*Testing & rental options available

DISC PELLETIZERS

ABOUT
[Disc pelletizers](#) offer a high level of particle size control, producing refined, rounded pellets. They are often combined with a pin mixer.

SIZE
 6' - 25' (1.8 - 7.5m)

CAPACITY
 1 TPH - 140 TPH*

APPLICATIONS

- Granulation
- Agglomeration

*Testing & rental options available

For additional details and specifications on agglomeration equipment, see our [Agglomeration Equipment brochure](#).

PUGMILL MIXERS

ABOUT
[Pugmill mixers](#) (paddle mixers) use a kneading and folding action to thoroughly mix solid and liquid feed components and if desired, produce granules.

SIZE
 22" - 78" (560 - 1,980mm)

CAPACITY
 2 TPH - 300 TPH*

APPLICATIONS

- Granulation
- Agglomeration
- Conditioning
- Coating
- Mixing

*Testing & rental options available

PIN MIXERS

ABOUT
[Pin mixers](#) use an intense spinning action to homogeneously mix solid and liquid feed components and produce dense granules.

SIZE
 15" - 50" (380 - 1,270mm)

CAPACITY
 500 lb/hr - 70 TPH*

APPLICATIONS

- Granulation
- Agglomeration
- Conditioning
- Coating
- Mixing

*Testing & rental options available

THERMAL PROCESSING EQUIPMENT

ROTARY DRYERS

ABOUT

[Rotary dryers](#) are known as a workhorse when it comes to drying bulk solids. They offer a high throughput, tolerance to changes in feedstock, a robust build, and long-term longevity and reliability.

SIZE

3' - 15' (1 - 4.6 m)

CAPACITY

1 TPH - 200 TPH+*
(1 MTPH - 181 MTPH+)

CONFIGURATIONS

- Direct
- Co-Current
- Counter-Current
- Indirect

*Testing options available

ROTARY COOLERS

ABOUT

Like rotary dryers, [rotary coolers](#) offer a high-throughput processing solution for cooling bulk solids. They are also recognized for their heavy-duty construction, reliability, and long lifespan when properly maintained.

SIZE

3' - 15' (1 - 4.6 m)

CAPACITY

1 TPH - 200 TPH+*
(1 MTPH - 181 MTPH+)

CONFIGURATIONS

- Direct
- Co-Current
- Counter-Current
- Indirect Water Deluge

*Testing options available

For additional details and specifications on thermal processing equipment, see our [Rotary Dryer & Cooler](#), [Rotary Kiln](#), and [fluid bed dryer](#) brochures.

ROTARY KILNS

ABOUT

[Rotary kilns](#) are used to carry out chemical reactions and phase changes in bulk solids. They are frequently used in applications involving incineration, calcination, thermal desorption, carbon reactivation, and more.

SIZE

Up to 15' (4.6m) diameter
x 100'+ (30.5m+)

CAPACITY

1 TPH - 50 TPH*
(1 MTPH - 45 MTPH)

CONFIGURATIONS

- Direct
- Co-Current
- Counter-Current
- Indirect

*Testing options available

FLUID BED DRYERS

ABOUT

[Fluid bed dryers](#) offer a cost-effective option for drying bulk solids in lower-capacity settings. They require minimal structural support and boast simple construction and improved heat transfer efficiency. They can also be configured to reuse recovered waste heat.

SIZE

4' - 20' (1.2 - 6 m)

CAPACITY

1 TPH - 50 TPH*
1 - 15mmBtu/hr
3,000 - 50,000 ACFM

*Testing options available

BULK MATERIAL HANDLING EQUIPMENT

BUCKET ELEVATORS

ABOUT
[Bucket elevators](#) are the industry standard for vertical handling, capable of moving everything from ores to fine chemicals.

SIZE
 Buckets from 8" - 52"
 (0.2 - 1.3 m wide)

CAPACITY
 20 - 600 TPH

CONFIGURATIONS

- Centrifugal Chain
- Centrifugal Belt
- Continuous Chain
- Continuous Belt

REVERSING SHUTTLE CONVEYORS

ABOUT
[Reversing shuttle conveyors](#) are used for building in-line, continuous piles, or feeding multiple fixed discharge points.

SIZE
 18" to 72" (0.5 - 1.8 m) wide

CAPACITY
 Up to 6,000 TPH

TROUGHED BELT CONVEYORS

ABOUT
[Troughed belt conveyors](#) horizontally convey a wide range of materials at angles between 0°-20°, or up to 30° with cleated belting.

SIZE
 18" to 72" (0.5 - 1.8 m) wide

CAPACITY
 up to 6,000 TPH

STEEP INCLINE CONVEYORS

ABOUT
[Steep incline conveyors](#) are a great substitute for drag chains or bucket elevators, because of the reduced noise and the elimination of transfer points.

SIZE
 18" to 72" (0.5 - 1.8 m) wide

CAPACITY
 Up to 600 TPH

SUPPLEMENTAL EQUIPMENT

HIGH-SPEED MIXERS

[High-speed mixers](#) are incorporated onto pug mills in the production of MCP, DCP, and DFP animal feeds. This improves the pre-mixing step in animal feed granulation, producing a more thorough reaction.

HAMMER MILLS

FEECO double rotor [hammer mills](#) are a heavy-duty crusher for use in size reduction efforts. Two sets of chain/bar links reduce dry and semi-moist materials with a minimum amount of fines and caking or plastering within the crusher.

BELT TRIPPERS

[Belt trippers](#), or traveling trippers, add versatility and functionality to troughed belt conveyors by creating multiple discharge points along the conveyor, along either side of the belt.

BELT PLOWS

[Belt plows](#) add another stationary point of discharge along a belt conveyor on either side of the belt to increase its flexibility.

COMBUSTION CHAMBERS

[Combustion chambers](#) serve to house the actual combustion reaction in direct dryers and kilns, preventing the flame from coming into contact with the material being processed.

BELT FEEDERS

[Belt feeders](#) are used to provide a controlled discharge rate of material. Commonly used when material that is either stockpiled or loaded (at an uncontrolled rate) in a bin or hopper needs to be introduced into the system at a controlled feed rate.

ENGINEERED

FOR PERFORMANCE

ENGINEERING CAPABILITIES

One of the advantages to working with FEECO is our extensive experience in engineering; our highly qualified staff of chemical, mechanical, and electrical engineers provides a well-rounded approach to system design, whether you are in need of a single piece of equipment, or a complete process system.

We can help bring your project to fruition with our versatile capabilities in front-end engineering, including the provision of:

- Equipment engineering
- Process flow diagrams/Mass balance
- Conceptual plant layouts
- Plant general arrangement drawings
- Civil works guide drawings with static and dynamic loads
- Structural steel and access platform guide drawings
- Chute and ductwork guide drawings
- Vendor interface, bid evaluation and analysis
- P&ID development
- Electrical and control systems engineering
- Material handling engineering
- Installation and commissioning review
- Site supervision for installation & start-up

Our engineering department works closely with our on-site fabrication facility to ensure stringent design and quality standards are met.

Project managers work to oversee your system is designed, manufactured, and installed to spec—on time and on budget.

All project managers and sales team members are experienced engineers and work with our staff of fully trained CAD and Inventor users to engineer a system around your unique requirements.

R&D

THE FEECO INNOVATION CENTER

The [FEECO Innovation Center](#) is a unique testing facility where we can test your material at both batch and pilot scale. Testing offers a host of invaluable information, allowing you to gain critical data on your material, work out process variables, fine-tune product characteristics, and develop a recipe for process scale-up. We've built a vast database on a variety of materials and test procedures. We offer comprehensive testing services in four categories:

- 1. Feasibility/Proof of Concept** - An initial, non-witnessed batch testing phase in which the possibility of creating a product is explored.
- 2. Proof of Product** - A more in-depth batch testing phase in which more time is spent determining whether a product can be made to desired specifications.
- 3. Proof of Process** - A continuous testing phase that aims to establish the equipment setup and parameters required for continuous production of your specific material.
- 4. Process/Product Optimization** - An in-depth study to optimize your specific material's characteristics and/or production parameters

UNPARALLELED REPORTING CAPABILITIES

The FEECO Innovation Center features a Rockwell Automation PLC/MCC system, which utilizes current technologies for optimizing testing operations through the collection and reporting of critical process data. These capabilities not only provide real-time insight into process performance, but they also allow returning customers to pick up exactly where they left off.

INTERESTED IN TESTING?

It's easy!

1 Fill out some **paperwork**

3 We'll run some **tests**

2 Send us a **sample**

4 We'll mail you the **results**

TYPES OF TESTING CONDUCTED IN THE FEECO INNOVATION CENTER:

AGGLOMERATION

- Pelletizing (Rotary drum, disc pelletizer, pin mixer)
- Micro-Pelletizing
- Coating
- Conditioning

THERMAL

- Drying
- Calcination
- Carbon Activation
- Catalyst Production
- Metal Recovery
- Organic Combustion
- Reduction
- Thermal Desorption
- Upgrading of Ores

Rotary Kiln
Batch Testing

Synthetic Gypsum
pelletized at FEECO

PARTS & SERVICE

SERVICE

From start-up and installation support, to preventative maintenance, FEECO offers a comprehensive [customer service](#) program to help keep your equipment running its best for years to come, whether your equipment is FEECO brand or otherwise. We offer the following services:

- Installation & Start-up Support
- Spare Parts
- Field Services
- Tire & Trunnion Grinding
- Drum Training
- Laser Alignment
- Gear Replacement
- Spare Parts Installation
- Inspections
- Equipment Audits
- Training Programs
- Process Optimization

PARTS

FEECO offers an extensive parts program to assist customers in keeping an inventory of wear-critical parts, as well as providing parts on an as-needed basis. In addition to providing parts for all FEECO equipment, we will also provide replacement parts for equipment built by other brands.

Our line of parts includes everything from the smallest component, to major items, including:

ROTARY DRUMS

- Tires (Riding Rings)
- Trunnion Wheels
- Thrust Rollers
- Drum Shells
- Drive Components
- Girth & Pinion Gears
- Seals
- Bearings

DISC PELLETIZERS

- Spray Systems
- Disc Assembly
- Drive Motor
- Scrapers/Plows
- Gear Reducer
- Bearings

MIXERS

- Pins & Paddles
- Shafts
- Shaft Bearings
- Drive Motors
- Spray Ports/System

ELEVATORS & CONVEYORS

- Buckets
- Chains & Belts
- Drive Motors
- Pulleys
- Gear Reducers
- Guarding
- Bearings
- Idlers
- Covers
- Drives
- Dust Collection Hoods
- Trippers
- Plows
- Feeders

ABOUT FEECO

FEECO International, Inc. was founded in 1951 as an engineering and equipment manufacturer. We are recognized globally as an expert in industry-leading process design, engineering capabilities (including everything from process development and sample generation, to feasibility studies and detailed plant engineering), custom equipment manufacturing, and parts and service. We serve a range of industries, including fertilizer and agriculture, mining and minerals, power/utility, paper, chemical processing, forest products, and more. As the leading manufacturer of processing and handling equipment in North America, no company in the world can move or enhance a concept from process development to production like FEECO International, Inc.

The choice to work with FEECO means a well-rounded commitment to quality. From initial feasibility testing, to engineering, manufacturing, and parts and service, we bring our passion for quality into everything we do.
