

PROCESS

Belt feeders meter material at a specified rate from a bin or hopper onto a conveyor. Chosen for our heavy-duty belt conveyors ideal for use in the mining industry, FEECO was commissioned to engineer and manufacture a custom belt feeder for introducing gold ore into the system.

The unit consisted of a 36" wide x 20' long belt conveyor mounted on a carriage frame. The frame rested on eight castor wheels that allowed the feeder to be winched in and out of place for ease of maintenance and cleaning.

PROJECT SPECS

Customer:
Proprietary

Equipment Supplied:
Belt Feeder

Project Location:
South America

Industry:
Mining

Material:
Gold Ore

Project Engineer:
FEECO International, Inc.
